PROFESSIONAL SUMMARY

Full-Stack Developer skilled in JavaScript, TypeScript, MERN, Next.js, and Python. Strong problem-solver with solid DSA fundamentals. LeetCode 1400+ and Codeforces 900+.

EDUCATION

Bachelor of Technology (Data Science)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 7.696/10.0
Intermediate (Class XII)	2022 - 2023
Noble Kingdom Senior Secondary School	Grade: 90.2%
Matriculation (Class X)	2020 - 2021
Noble Kingdom Senior Secondary School	Grade: 94.0%

INTERNSHIPS

Full Stack Developer	May 2025 - September 2025
Advit Itec	<i>Remote</i>

- Engineered a high-performance, responsive **single-page React application** for customer onboarding by integrating **complex multi-step forms**, dynamic service selection, and **automated proposal generation** to improve the digital user journey.
- Architected and deployed a **secure administrative dashboard** featuring **environment-based authentication**, granular user management, advanced data filtering, and optimized **MySQL-backed data persistence** to ensure seamless internal operations.
- Integrated **WhatsApp/Email APIs**, **automated PDF generation**, and **Cloudinary hosting** to facilitate seamless proposal sharing and significantly enhance the end-to-end user engagement through a streamlined and highly efficient communication workflow.
- Collaborated effectively within a **cross-functional team of four** using **Agile methodologies** to ensure a **scalable system architecture**, maintain high-quality code standards, and guarantee the consistent delivery of high-priority technical features.

PROJECTS

AI-Powered Credit Risk Engine (Github) (Demo)	March 2026
--	------------

- Engineered a sophisticated **multi-model credit risk system** leveraging **Logistic Regression**, **Random Forest**, and **Gradient Boosting** to achieve superior prediction reliability and performance compared to traditional, single-model baseline architectures.
- Developed a robust **FastAPI backend** to execute **weighted ensemble scoring** and expose **REST APIs** for real-time risk evaluation while flagging high-variance model disagreements for detailed edge-case analysis and manual review.
- Implemented an **AI decision workflow** using **LangGraph** and **Groq API** to generate explainable, policy-compliant lending recommendations from **machine learning model** outputs for transparent, automated decision-making.
- Designed a scalable and modular **machine learning** inference pipeline that combines deterministic scoring with **LLM-generated reasoning** to deliver transparent, automated, and defensible underwriting decisions for diverse sets of applicants.

SolUPI (Github) (Demo)	November 2025
---	---------------

- Developed a **full-stack decentralized** on-ramp enabling instantaneous **UPI-to-Solana transactions**, built with **Next.js**, **TypeScript**, **Node.js**, and a high-performance **PostgreSQL** database for secure, scalable data management.
- Architected a secure, non-custodial flow allowing users to purchase **USDC directly via UPI**, with **automated email-based RRN verification** to trigger instant, trustless, transparent and auditable on-chain settlements on **Solana**.
- Built a high-performance dashboard with **Tailwind CSS** and **Framer Motion**, integrated with **Solana Web3.js** for on-chain transfers, **JWT authentication**, and paginated order tracking for a reliable, seamless user experience.
- Deployed a production-ready system on **Vercel** and **Render** to bridge **fiat and crypto** through a secure, fully automated and **scalable UPI-powered workflow**, eliminating reliance on risky P2P trades or centralized exchanges.

SKILLS

AI / ML: RAG, Machine Learning, Natural Language Processing, TensorFlow, Transformers, LLM, n8n Introduction, Generative AI, LangChain, LangGraph, Natural Language Toolkit (NLTK), PyTorch, Crew AI, MCP, Vector Embeddings

APIs & Testing: Playwright

Cloud & DevOps: Kubernetes, AWS, Docker, GitHub Actions

Computer Languages: Python, TypeScript, Rust

Frameworks & Libraries: FastAPI, Next.js, Matplotlib, seaborn, React, Node.js

EXTRA-CURRICULAR ACTIVITIES

- Contributed to the **Nosana** ecosystem by developing the **Skill Marketplace** and **Nosana MCP**, simplifying AI skill discovery, deployment, and access to **decentralized GPU infrastructure**.
- Open Source Contributor at **GetAlby** (Bitcoin Lightning ecosystem) under Summer of Bitcoin 2025 raised **6 PRs** with 3 merged.
